prepare a detailed technical and popular report.

Volume 11 focuses on Pool 10, Guttenberg Iowa. A staggering 333 archaeological sites have been reported in the study area in the Pool 10 environs. This is clearly an artifact of both collector and research bias and should not be interpreted as a realistic differential density of archaeological sites relative to pools 1-9. A single historic district, the St. Feriote Archaeological and Historic District in Prairie du Chien, is listed on the National Register of Historic Places and two additional districts in the City of Guttenberg, Iowa are currently pending.

Remarks:

Site is being eroded by the Mississippi River from a talus slope remnant on the eastern base of the bluff line contained within the Effigy Mound National Monument, McGregor, Iowa. The above remnant is mantled by ca. 2' of recent (post 1930) alluvium and channel dredge-sand (spoil). Horizontal erosion (east to west) is dramatic (cf. Preliminary Report on the FTD, 13 AM 210, Village, Luther College, 1975). Recommendations: Immediate considerations for testing.
